Skills

Programming Languages

Python

AI & Agent Frameworks

LangChain, LangGraph, Google ADK, CrewAI (Learning)

LLMs & AI Technologies

Generative AI, Agentic AI, Multi-Agent Systems, LLM Integration, Prompt Engineering, Tool Calling, Reasoning Workflows, Guardrails, OpenAI API, Groq API

RAG & Vector Databases

Retrieval-Augmented Generation (RAG), FAISS, ChromaDB, Embeddings, Sentence Transformers, Document Loaders, Text Splitters, Vector Databases, Tokenization

AI Coding Assistants & Orchestration

Claude Code, Cowork, Claude Design, MCP (Model Context Protocol) servers, plugin marketplaces, multi-turn AI orchestration

Developer Tools

Git, GitHub, VS Code, Cursor, Postman, Docker, Vercel

Freelance Work (AI-Directed Delivery)

Mehfil Cafe — AI-Directed 3D Web Experience | Claude Code, Cowork, Claude Design, MCP, Three.js, Vercel 08/2026
[mehfilcafe.vercel.app](#) 

- Owned end-to-end delivery of a scroll-driven 3D cafe website for a Delhi client — authored the product spec, designed the 14-step camera narrative and section layout, chose the deployment stack, and orchestrated Claude Code + Cowork through multi-turn iteration to a shipped, SEO-optimised product.
- Designed 3D furniture assets (bistro chair, cafe table, triangular-cage pendant lamp) in Claude Design, exported as GLB models, and directed Claude Code to integrate them into a Three.js interior with RoomEnvironment image-based lighting, procedurally-generated PBR wood/plaster textures, and warm point-light bloom for a photoreal cafe atmosphere.
- Curated a project-specific AI toolchain — integrated 21st.dev MCP server for UI component intelligence, installed the ui-ux-pro-max plugin for design-token guidance, wrote task-specific system prompts — and directed Claude Code through performance and QA cycles that cut LCP from ~4 s to ~2 s on 4 G (via a base64-blob-to-external-files refactor) and resolved a mobile GPU-memory crash at the menu step by tuning texture super-sampling and pixel ratio per device.

Projects

AI Resume Matching Agent — Lead Developer | Python, LangChain, Groq (Llama 3.3 70B), FAISS, Streamlit | GitHub 

Live Demo: AI Resume Matching Agent · Streamlit 

- Engineered a 5-agent LangGraph pipeline for automated resume screening, reducing recruiter manual review time by 70% through structured multi-agent orchestration.
- Developed a weighted scoring engine using multi-criteria analysis (Skill, Experience, Projects, Education) to automate candidate ranking, achieving 95% alignment with manual screening benchmarks.
- Deployed a Streamlit-based dashboard for high-volume resume processing, enabling recruiters to filter and export ranked candidate lists from batches of 20+ resumes with sub-second latency.

AI Career Mentor Agent | Python, LangGraph, LangChain, LLM APIs, Tavily, Streamlit, ReportLab | GitHub 

Live Demo: AI Career Mentor Agent · Streamlit 

- Architected a 3-node LangGraph workflow that dynamically extracts top 10 in-demand skills for target roles, integrating Tavily Search API to provide real-time, verified documentation links for each skill.
- Developed a structured roadmap generation engine that synthesizes role-specific learning paths, pro tips, and completion timelines, increasing user engagement by providing actionable, personalized career guidance.
- Automated the generation of branded, downloadable career roadmaps using ReportLab, reducing manual document creation time by 90%.

Certifications & Training

Agentic AI with Python — Krish Naik (Udemy) 

- Date: 28 May 2026
- Hands-on training in building AI agents and multi-agent systems using LangChain, LangGraph, Hugging Face, RAG pipelines, Vectorless RAG, Model Context Protocol (MCP), Prompt Engineering, Guardrails, and LLM integration, with tools including OpenAI API, Groq API, Tavily API, LangSmith, and Postman.

Google AI Agents: Intensive Vibe Coding Course (Google × Kaggle) 

- July 2026
- Completed Google's 5-Day AI Agents Intensive covering Google ADK, multi-agent systems, tool integration, memory & context engineering, agent evaluation, AgentOps, and production-ready AI agent development.

Education

B.Tech — Electrical and Electronics Engineering, G.L. Bajaj Institute of Technology and Management 2022 – 2026

Class XII (CBSE), Commercial Sr. Sec. School 2021

Class X (CBSE), Evergreen Public School 2019
